OBJECTIVE: Secure a technological opportunity where I will use my Computer Science background and interpersonal skills to further company growth and improve my readiness to contribute to my chosen field of software engineering.

EDUCATION:

Georgia State University- Atlanta, Georgia
Bachelor of Science in Computer Science
GPA: 3.4/4.00

Graduation Date: December 2024

RELEVANT COURSES:

- Mobile App Development
- Data Mining
- Machine Learning
- Software Development
- Computer Architecture
- Software Engineering

SKILLS:

- HTML & CSS
- Django, Nodejs, React, Vite
- PostgreSQL, pgAdmin
- JavaScript, Typescript
- C#, C++
- Java, Python
- Flutter, Dart, Google Firebase

PROJECTS/RESEARCH:

Website

Personal Portfolio

June 2022

- Built with Django, a Python library, and Bootstrap, a CSS CDN
- Custom JavaScript animation without a library

Website & Mobile App

Weatherly: The Weather App

November - December 2024

- Built with Flutter, Dart, National Weather Service API and Google Firebase
- Displays information & radar provided by National Weather Service API along with having the ability to save and customize settings

Applet

XBRL Scraper

- Constructed with Python; integrated with basic SMTP protocol for sending over data through email
- Interacts with SEC Edgar API and XBRL's API
- Stores the scraped reports and metric into a SQL database

Data Mining

Diabetes Prediction Modeling

September - December 2024

- Constructed with Python; used data from CDC to predict what lifestyle components contribute to diabetes and pre-diabetes

Virtual Cookbook Platform

AllRecipes Mockup

August – December 2023

- Constructed a mock-up of a cooking platform Allrecipes with Django Framework and PostgreSQL database hosted on the Render hosting platform

Georgia State University

Math Path Scholar: Tissue Engineering Assistant

May – August 2024

- Crafted manuscripts and posters for the new Tissue Engineering research
- Presented information about the research and mathematics behind the modeling of the tissue project

EXPERIENCE:

Marathon Petroleum Corporation (MPC)

Application Developer Intern

May – August 2023

- Frontend and backend development on Marathon's retail payments application using ASP.NET MVC
- Helped maintain data integrity and data validity between MPC and third-party companies via SQL procedures
- Aided in converting an MPC website from using ASP.NET Webforms to ASP.NET MVC

DAPCEP & PwC & Extern

Nonprofit Consulting Extern in Collaboration with PwC

March – May 2024

- Researched similar non-profit organizations for comparative analysis of DAPCEP's programs and impact reporting
- Crafted an impact assessment framework that defines how to qualitatively and quantitatively show impact
- Presented findings and impact assessment framework to company leaders and some board of directors of DAPCEP

UWCI & PwC & Extern

Nonprofit Consulting Extern in Collaboration with PwC

March – May 2024

- Researched similar non-profit organizations' programs and volunteer retention strategies.
- Crafted an impact assessment framework that defines how to qualitatively and quantitatively show impact

LEADERSHIP/ORGANIZATIONS:

National Society of Black Engineers

September 2022

Computer Science Club

June 2022

- Contributed code to the club's GitHub repository.

ACTIVITIES/AWARDS:

BDPA "Datathon" 4th Place Winner

August 2022

Creatica 2022 Hackathon Participant

June 2022

- Contributed backend code to a project called "Questify" (an app like Kahoot and Quizlet)
